

# PODOSCAN II

## IMPORT AN IMAGE IN ONLY 3 CLICKS

THANKS TO THE SPEED OF THE SOFTWARE AND THE SCANNER AND ITS EASE OF USE

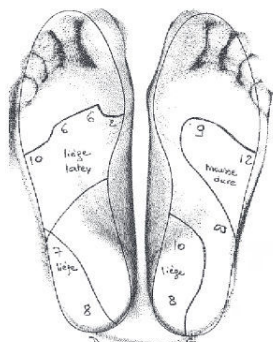

### THE PODOSCAN II DEVICE

The patient is on the PODOSCAN II device

What you see on your computer

One of the many possibilities of PODOSCAN II with PODOSOFT, (PODOSTAR): edition in size 1/1, plan of insoles drawn by your care and rescanned to be kept in the file of the patient

Allows podiatrists to use the scanner image to take loaded, 1/1 and reduced size footprints.

The image imported into our PODOSOFT clinical management software will be kept in the patient's file and can be re-edited at any time.

The display of 1 to 4 images on the screen (in the PODOSOFT software) allows to make a comparison of the evolution in time, the edition allows to communicate with the prescribers and the patients, to serve as a plan of insoles. It also allows to keep X-rays, prescriptions or to scan thermoformed insoles.

## PODOSCAN II SOFTWARE

THE NEW PODOSCAN II DEVICE  
AND SOFTWARE PODOSCAN IIAN  
A3 SCANNER  
HIGH SPEED, EXCELLENT RESO-  
LUTION  
AND A MULTIPLIED SCANNING  
AREA.

### HIGH SPEED, EXCELLENT RESOLUTION AND A MULTI- PLIED SCANNING AREA

PODOSCAN II software: specialized acqui-  
sition of the foot scan. PODOSCAN device:  
case for the scanner.

Free hot-line for the first three years of  
software acquisition (beyond that: sof-  
tware update or hot-line billing)

### OPERATION OF THE PODO- SCAN II SOFTWARE

- ✓ With older PODOSCAN devices and PODOSOFT software
- ✓ With an A3 scanner and the new PODOSCAN II device
- ✓ With all current scanners
- ✓ Independent

The chaining of PODOSOFT and electronic pedometers  
FootWork® and FootWork Pro® makes it possible to as-  
sociate on the same edition a footprint under load and  
pressure measurements.
